Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12,13,16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurley, Jr., (3,323,208).

With respect to claim 12 Hurley discloses an umbilical cord clamp comprising a pair of arms (10,11) having a length in a generally V-shaped configuration having rear end portions joined together at the apex thereof and having free forward end portions normally disposed in spaced-apart relation and being movable towards each other for clamping an umbilical cords between the arms; as set forth in column 2, lines 1-18; a channel (18a,17a, 27a,28a) that extends substantially along the length of at least one arm and is open at the free end portion thereof capable of facilitating the escape of fluid therefrom when the clamp is closed; as best seen in FIGS: 2, 7-9; and locking portion (15,16) for securing the arms together when the clamp is closed.

With respect to claims 12, 16, Hurley disclosed all the limitations as best seen in the Figures.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3732

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hurley Jr. (3,323,208).

With respect to claims 14, 15, it is noted that Hurley Jr. did not teach of clamp with a channel having a width of about $\frac{1}{4}$ to $\frac{1}{2}$ of the width of each arm and increases toward each open end; as claimed by applicant. However, applicant fails to establish the criticality of such dimensions and the examiner believes that any dimensions could have been used, since it has been held that where the general conditions of a claim are disclosed in the prior art discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

Response to Amendment

Applicant's arguments with respect to claims 12-16 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 1-11, 17-25, are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3732

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
